

It's Good to Be Connected... In All the Right Places

Now You Can CONNECT ALL... with our Commercial- Integrated Systems

To substantially reduce the potential for loss at your commercial property, CamGuard security experts will conduct a complete site survey to determine the threat and vulnerability profile of your investment. Next, a full risk assessment will be prepared, and together we will determine the best security solutions to fit your needs and budget.

Low Voltage = High Powered Security and More

CamGuard's Low Voltage Integrated Systems Division can provide an extensive array of services that can use your existing "IT" infrastructure or even build in a wireless option. We now offer: affordable video monitoring, flexible security systems and true integrated protection packages. You can trust the expertise of CamGuard to solve all your security concerns by applying the right mix of guards, CCTV cameras, alarms, and access control technologies right where you need them. It's our exceptional people using incredible technology that set the standards in protection services.

EXCEPTIONAL PEOPLE – INCREDIBLE TECHNOLOGY
